H&C® INFUSION® REACTIVE CONCRETE STAINS are the artistic way of giving a translucent, variegated appearance to bare, horizontal new or existing concrete. Every slab of concrete is a blank canvas with acid staining. Acid stains accentuate any imperfections in the concrete like small cracks, or contaminants, much like the opposite of painting or sealing the concrete with a solid color stain...no two projects will ever be the same!

FEATURES & BENEFITS:
- Gives new and existing concrete a new translucent, variegated appearance
- Long lasting performance at a lower cost than other floor installations
- Multiple colored effects can be created
- Excellent for use in commercial, residential, institutional and industrial areas
- Solvent-based, water-based sealers and floor finish complete and protect the floor look

RECOMMENDED USES:
- Bare concrete indoor or outside a home
- Pool decks
- Patios and walkways
- Driveways
- Stores and malls
- Restaurants
- Office buildings

AVAILABLE COLORS

Additional colors can be achieved by inter-mixing the colors. These colors are a representation. Actual color will vary due to the concrete finishing method (how smooth or porous the surface is), producing a mottling or distressed appearance.

HC 400  Wenge Wood
