

URETHANE PAVER SEALER 2-PART CLEAR

CLEAN, SAND & SEAL IN ONE DAY.

H&C® Urethane Paver Sealer is the ultimate time-saver. It's a two-part sealer that protects pavers and concrete substrates, and lets you start and finish a job in one day.*

Ideal for pavers, concrete and masonry surfaces and more.

*If polymeric sand was used to fill joints between pavers, allow 24-72 hours, per manufacturer's instructions, to cure before applying sealer.

Commonly used on:

- Pavers
- Patios & walkways
- Driveways
- Pool decks
- Lanais
- Natural stone
- Brick & block

- **Can be applied to damp concrete**
Do not apply if rain is expected within 8 hours of application.
- **Locks in paver joint sand**
- **Enhances color of concrete and pavers**
- **Excellent dirt, stain and chemical resistance**
- **Coating/Sealer provides the protection from mold, mildew, algae growth and UV damage**
- **Hot tire pick-up resistant and resists tire marking**
- **Low VOC <50g/L**

START STRONG WITH THE RIGHT PREP.

Remove all debris, dirt and dust from the surface. Then scrub the floor with **H&C® ConcreteReady® Cleaner/Degreaser**, rinsing and drying completely.

Etching is an essential step.

Etching concrete with **H&C ConcreteReady Etching Solution** prepares the surface to be coated by opening up the pores of concrete, so H&C coatings can properly bond with the surface. It ensures proper adhesion and an even finish.
